CalGems| Full Stack | <https://serene-anchorage-99994-207a1d3f8d8d.herokuapp.com/>

Javascript fullstack with Yelp-like functionality that allows users to add or review hiking trail posts

- features CRUD functionality (create, read, update, delete) for both trails and reviews
- Use of Bootstrap CSS library
  - Bootstrap to style pages
  - Bootstrap used to add extra layer of authentication and UI for forms
- Implemented with a Mongo database through Mongo Atlas
  - Connected with the database built by Mongo Atlas using mongo
- Implementation of Express Framework
  - Started the app server through express
  - Implemented routes through express
- Use of MVC (models, views, controllers) pattern
  - Pattern used to divide the project's logic and styling into different folders
